

How to access GDOT projects using ProjectWise Web Connections

Accessing GDOT projects through a web browser is now done through <https://connect.bentley.com>. External consultants will need to use a project link the first time opening the project. The list of GDOT projects currently available for Web Connections is found here:

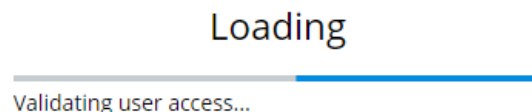

http://www.dot.ga.gov/PartnerSmart/DesignSoftware/ProjectWise/GDOT_PW_Web_Connections_Links.pdf

Please submit a ticket to [Solutions Center](#) with the subject of “ProjectWise” if the project you seek is missing from the list.

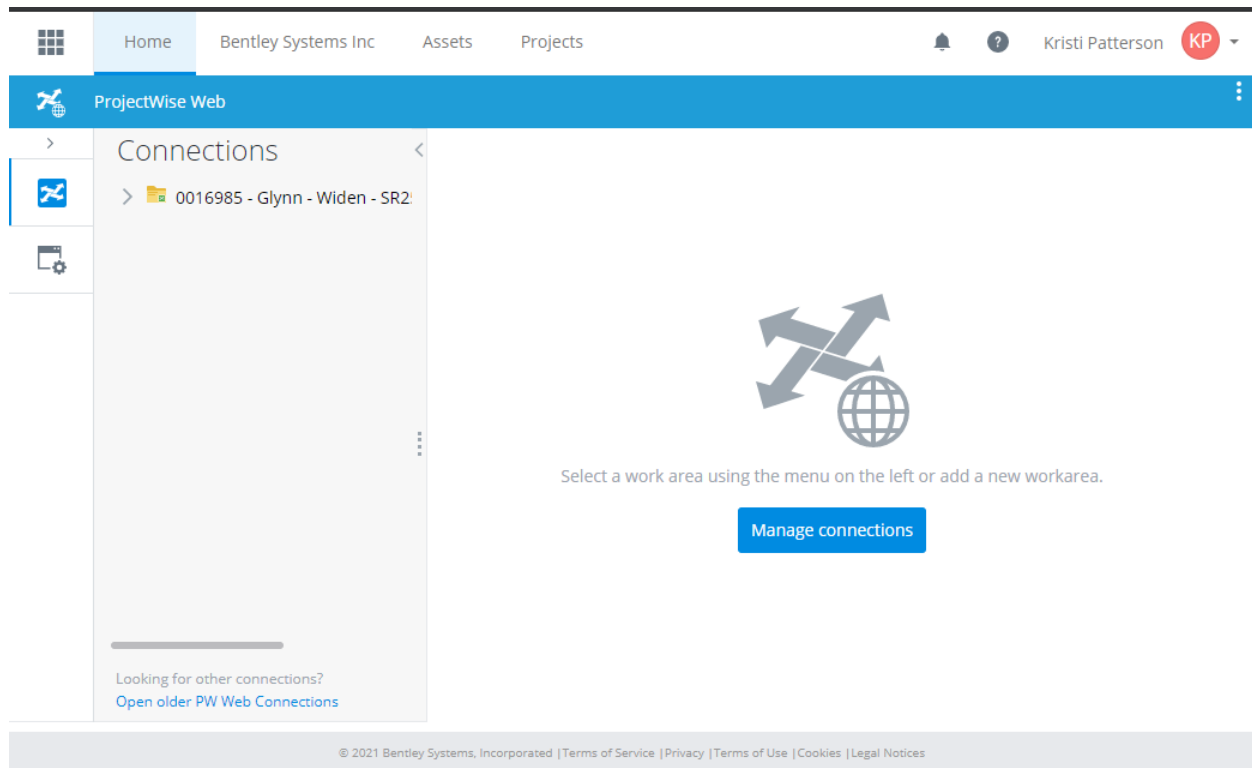

Once you have clicked on the link for the desired project, the web browser will open and ask for login to Bentley if you are not already logged in. These are the same credentials used to log into Connection Client or any other Bentley resource like Communities.

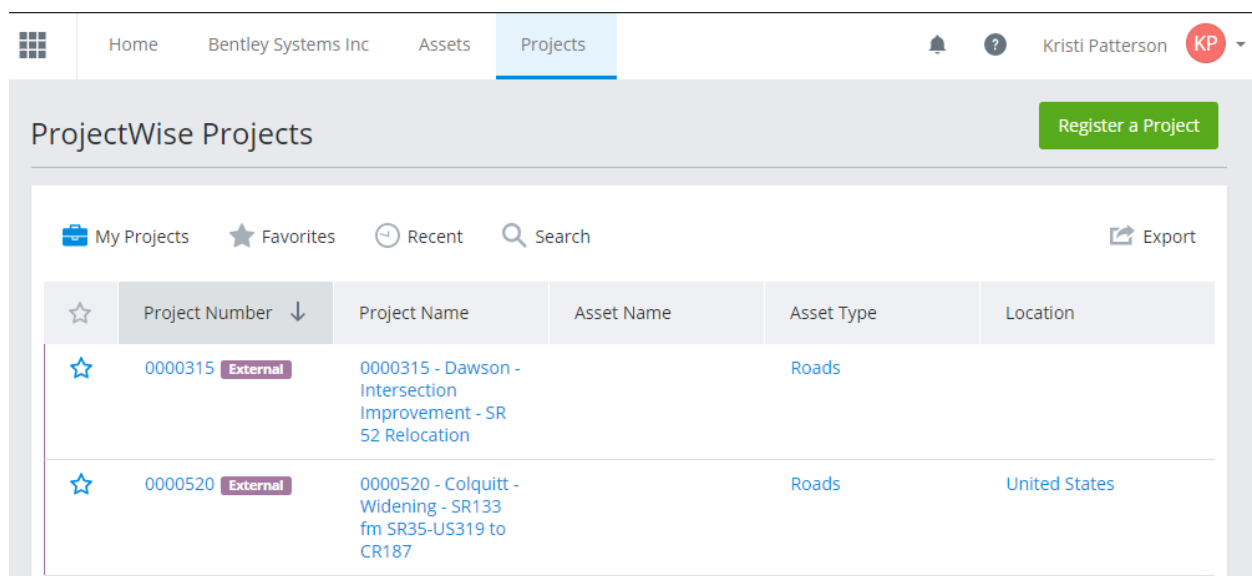

Once you have logged in successfully, the system will then validate your access to the project. Please be patient as this may take a few moments.

When the validation has completed, the project will be listed in the left-hand panel which is now ready for you to access for your work. Click the arrow next to the project to expand it.

After this initial connection to the project, it will now be added to your My Projects list which you can use to access it in the future instead of using the link from the PDF list. Click on the **Projects** tab at the top of the window and then click My Projects to see your connected projects. The GDOT projects will have an “external” tag next to it for external consultants.

For projects that you will need to access on a regular basis, you can make them **Favorites** so they will be easier to locate. Just click on the Star icon next to the project to make it a favorite and then it will be listed in the Favorites group.

The screenshot shows the 'ProjectWise Projects' interface. At the top, there's a navigation bar with 'Home', 'Bentley Systems Inc', 'Assets', and 'Projects' (selected). A user profile for 'Kristi Patterson' is visible. Below the navigation bar, there's a 'ProjectWise Projects' header with a 'Register a Project' button. The main content area has tabs for 'My Projects', 'Favorites', 'Recent', and 'Search'. A table lists projects with columns: Project Number, Project Name, Asset Name, Asset Type, and Location. One project is highlighted with a star icon: '0000315 - Dawson - Intersection Improvement - SR 52 Relocation' under the 'Roads' asset type. Below the table, there's a 'Videos' section.

When you click on the project to open it from your My Projects or Favorites list, it will open the main project page showing the project details and providing links to tools and utilities for your use on that project.

The screenshot shows the main project page for '0000315 - Dawson - Intersection Improvement - SR 52 Relocation'. The page has a header with the project name and a star icon. Below the header, there's a 'Project Details' section with fields like 'Registered: Tuesday, March 26, 2019', 'Modified: Tuesday, April 27, 2021', 'Registered By: Glenn Williams', 'LastModifiedBy: Kristi Patterson', 'Industry: Roads and Highways', 'Asset Type: Roads', 'Location: Not Specified', 'Project Country: US', 'Time Zone: Eastern Standard Time', and 'Data Center Location: East US'. There's also a 'ProjectWise Connections' section with '1' connection, 'ContextShare Connection' with '0' connections, and 'SharePoint Connections' with '0' connections. To the right, there's a 'Team Members' section with a list of team members: AM ABREHAM MEDHIN, AW Adrienne Wise, BM Becky Meeks, BD Bethany Davis, and BW Brandon Wiggins. Further right is an 'External Organizations' section with a list of organizations: BP BALDWIN P..., (Organiz...), (Organiz...), (Organiz...), and (Organiz...). Below these sections, there's a 'ProjectWise 365 Services' section with four tiles: 'Share', 'ProjectWise Web Connections', 'Deliverables Management', and 'Project Insights'.

Under the ProjectWise 365 Services area below the Project Details, you will find a tile for **ProjectWise Web Connections**. Clicking this tile will open the Web Connection for that project as was done during the initial connection process from the PDF link.

The image shows two parts of the ProjectWise interface. The top part is the 'ProjectWise 365 Services' area, which contains eight tiles arranged in a 2x4 grid. The tiles are: Share, ProjectWise Web Connections, Deliverables Management, Project Insights, Portfolio Insights, Issue Resolution, Forms, and Components Center. The bottom part is a screenshot of the ProjectWise Web application. The top navigation bar shows 'Home', 'Bentley Systems Inc', 'Assets', 'Projects', and a dropdown menu for '0000315 - Dawson - Intersection Improvement...'. The main content area is titled 'Connections' and shows a list of folders for the project '0000315 - Dawson - Intersection Improvement - SR 52 Relocati'. The folders are: CST (Construction), Incoming RFI documents, Maintenance, Outgoing RFI responses, PE (Preconstruction), Record Plan Sets, Submittal documents, and Transmittal responses. The table has columns for Name, Checked Out, File Updated, State, and Version.

Name	Checked Out	File Updated	State	Version
CST (Construction)				
Incoming RFI documents				
Maintenance				
Outgoing RFI responses				
PE (Preconstruction)				
Record Plan Sets				
Submittal documents				
Transmittal responses				

Using ProjectWise Web is simple and easy to navigate. If you would like some additional documentation on how to use the ProjectWise Web tools, please check out this information provided by Bentley:
